Material change on our valve cover gasket 638.901 for
MAN D28

We have improved our valve cover gasket 638.901 and replaced the coating with a completely new material development with the designation EWP 407. This material has a similar compressibility to the previous material, but now also has non-stick properties thanks to the PTFE coating. This makes disassembly easier and removes the cleaning required on the sealing surfaces almost completely. It has extremely good resistance to oils and fuels and also impresses with its excellent sealing performance even in unfavourable conditions on screw holes. The new material has also resulted in a visual change – the valve cover gasket is no longer supplied in the typical red, but now comes in grey and in the proven Elring OE quality.

Old 638.901 – MAN 51.03905.0134
Material: EWP red (Soft material)

NEW 638.901 – MAN 51.03905.0134
Material: EWP 407 grey (Soft material)
